

Cried Melody
by Nishaun Smith

How loud can one sound their tears,
when they want someone to hear?
How far can that loud note reach?
Can it reach as far as clouds?
Can one's tears form a rainbow?
This is the time of crying.
One cannot quench hell with tears.
Tears are on the path of truth.
This causes many to hide.
The grieved are ready for God.
For him to end their sadness.
The cried melody is then
faithful sonance of gladness.
